prostate **MRI** COURSE

FRIDAY JUNE 3, 2011
Venue

Teaching Course on MR Spectroscopy with hands-on sessions
Ghent University Hospital, De Pintelaan 185, 9000 Ghent, Belgium

SATURDAY & SUNDAY
JUNE 4-5, 2011
Venue
Main topics

1st ESUR Teaching Course on Prostate MRI

Plenary sessions and interactive discussions

Het Pand, Onderbergen 1, 9000 Ghent, Belgium

- Overview of the normal and diseased prostate
- Interpretation of MRI techniques (T2W, DWI, MRSI, DCE-MRI)
- MRI in the diagnosis and staging of prostate cancer
- MRI guided biopsy and therapy monitoring
- Recommendations and ESUR guidelines

Learning objectives

This teaching course aims at providing practical information for radiologists who are willing to start or promote prostate MRI at their own institution. It will include formal state-of-the-art lectures presented by experts in the field, but also practical case studies and ample time for open discussions amongst participants and experts. The teaching course will be preceded by a comprehensive 1-day special-focus course on prostate MR-spectroscopy, integrating educational lectures, practical demonstrations and hands-on sessions.
