Creating Value with Intelligent MR

Canon Medical and Olea Medical are utilizing intelligent image enhancement and advanced post-processing technology to create true value in MR imaging. Artificial Intelligence is fast opening up a new world of value in MRI. Canon and Olea are collaborating with research sites globally to bring MRI to a new era of speed, patient comfort and advanced diagnosis.

Canon/Olea Sponsored Symposium

July 24 - August 14 2020

Please view pre-recorded webinars to learn how key radiologists from Europe and the USA view the role of MRI in the post-Covid era, and learn about CEST imaging, a promising MRI method for tumor characterization.

Canon Medical Session

MRI in the Post-Covid Era

- **Professor Vincent Dousset**
  Bordeaux University Hospital, France

- **Professor Luca Saba**
  University of Cagliari, Italy

Olea Session

CEST Imaging

- **Professor Joao Lima**
  John Hopkins University, USA

- **Professor Josep Puig**
  Comparative Medicine and Biomage Centre of Catalonia, Spain

Join our Live Q&A Webinar on August 13

Webinar participants will be available to answer your questions

**Time: 5-6pm (Europe UTC), 1-2pm (USA EDT)**

Please visit our virtual booth to learn more from August 8-14, 2020
