

Review

- 917 **Motion Mitigation Techniques for Abdominal and Cardiac MR Imaging**
Eric M. Schrauben, Gastao Lima da Cruz, Christopher W. Roy, and Thomas Küstner
- 938 **The Utility of Elastography in Discriminating Stages of Liver Fibrosis and Risk Stratification in Patients With Primary Sclerosing Cholangitis: A Systematic Review**
Payam Hashemi, James L. Boyer, and Jonathan H. Langdon

Research Article

Head and Neck

- 959 **Superior Ophthalmic Vein Congestion in Thyroid Eye Disease: Assessment With 3D T1-Weighted Imaging and Association With Intravenous Glucocorticoid Therapy Outcomes**
Linhan Zhai, Feng Li, Huan Liu, Lihui Dai, Ziyu He, Haoyue Shao, Yu Chen, Litong He, Yangyang Yin, Baoyi Wang, Zixin Zhou, Qiuxia Wang, Gang Yuan, Hong Chen, and Jing Zhang

Editorial

- 968 **Editorial for “Superior Ophthalmic Vein Congestion in Thyroid Eye Disease: Assessment With 3D T1-Weighted Imaging and Association With Intravenous Glucocorticoid Therapy Outcomes”**
Xiao-Quan Xu

Abdomen

- 970 **Structural and Functional Lung Assessment in Neonates With Moderate to Severe Bronchopulmonary Dysplasia Using 3D Ultra-Short Echo Time MRI**
Samal Munidasa, Nara S. Higano, Matthew Willmering, Alexander M. Matheson, Robert J. Fleck, Paul S. Kingma, Erik B. Hysinger, and Jason C. Woods

- 984 **Intraindividual Comparison of Half-Dose Gadopiclenol and Standard-Dose Gadobenate Dimeglumine for Contrast-Enhanced Abdominal MRI**
Antonella Del Gaudio, Domenico De Santis, Ludovica Lofino, Danielle E. Kruse, Kevin R. Kalisz, Rajan T. Gupta, Francesco Ria, and Daniele Marin

- 996 **Prospective Comparison of DWI-Derived Virtual MR Elastography and Conventional MR Elastography in Metabolic Dysfunction-Associated Steatotic Liver Disease and Healthy Volunteers**
Anton Volniansky, Thierry L. Lefebvre, Merve Kulbay, Guillaume Gilbert, Boyan Fan, Justine Racette, Emmanuel Montagnon, Damien Olivie, Giada Sebastiani, Jeanne-Marie Giard, Marie-Pierre Sylvestre, Bich Ngoc Nguyen, Guy Cloutier, and An Tang

Editorial

- 1009 **Editorial for “Prospective Comparison of DWI-Derived Virtual MR Elastography and Conventional MR Elastography in Metabolic Dysfunction-Associated Steatotic Liver Disease and Healthy Volunteers**
Philippe Garteiser, Omaïma Saïd, Sabrina Doblaz, and Bernard E. Van Beers

- 1011 **Deep Learning for Differentiating Benign From Malignant Bile Duct Dilation on MRCP: Development and Prospective Evaluation of an Xception-Logistic Regression Ensemble Model**
Jiong Liu, Lihong Li, Jing Zhang, Chunmei Yang, Xinqiao Huang, Yue Shu, Xiaopeng He, and Jian Shu

Editorial

- 1023 **Editorial for “Deep Learning for Differentiating Benign From Malignant Bile Duct Dilation on MRCP: Development and Prospective Evaluation of an Xception-Logistic Regression Ensemble Model”**
Tej Mehta, Grafe Lyons, and Robert Liddell

- 1025 **Multiparametric MRI for Predicting Renal Function Deterioration and Chronic Kidney Disease Development in Patients Undergoing Nephrectomy for Renal Masses: A Pilot Study**
Mira M. Liu, Octavia Bane, Xin Mu, Haitham Al-Mubarak, Arthi M. Reddy, Ian Bolger, Ghadi Abboud, Paul Kennedy, Philip Robson, Kirolos Meilika, Amir Horowitz, Bernd Kuhn, Samira Farouk, Ketan Badani, Bachir Taouli, and Sara Lewis

Editorial

- 1040 **Editorial for “Multiparametric MRI for Predicting Renal Function Deterioration and Chronic Kidney Disease Development in Patients Undergoing Nephrectomy for Renal Masses: A Pilot Study”**
Maxime Schleef and Sandrine Lemoine

- Neuro**
- 1042 Contrast-Enhanced MR Fingerprinting With Delta-Relaxometry: Investigating a New Avenue for Tumor Characterization**
Shengwen Deng, Walter Zhao, Sree Gongala, Jessie E. P. Sun, David W. Jordan, Chris A. Flask, Mark A. Griswold, Dan Ma, and Chaitra Badve
- 1053 Evaluation of Brain Microstructural Alterations in Preschool Autism Spectrum Disorder: A Voxel-Wise Multimodal MRI Study**
Changhao Wang, Meiyang Cheng, Yu Lu, Jinxia Guo, Xueyan Liu, Zhanqi Feng, Shipeng Liu, and Xin Zhao
- 1067 Hippocampal Subfield Integrity and Age-Driven Neural Correlates of Appetite Loss in Amyotrophic Lateral Sclerosis**
Sadegh Ghaderi, Sana Mohammadi, and Sanjay Kalra
- 1079 IDH Mutation Classification in Nonenhancing Gliomas: A Comparison of Habitat and Whole-Tumor Transfer Learning Strategies**
Yu Han, Yuyao Wang, Wuxun Cui, Sijie Xiu, Yang Yang, and Jin Zhang
- Editorial**
- 1090 Editorial for “IDH Mutation Classification in Non-Enhancing Gliomas: A Comparison of Habitat and Whole-Tumor Transfer Learning Strategies”**
Zeng shanmei and Zhao Jing
- 1092 Mapping Intracellular Volume Fraction With Susceptibility Source Decomposition as a Marker for Tissue Cellularity**
Giulia Debiasi, Oliver C. Kiersnowski, Giovanni Librizzi, Luca Roccatagliata, Renzo Manara, Mauro Costagli, Alessandra Bertoldo, and Chunlei Liu
- Editorial**
- 1106 Editorial for “Mapping Intracellular Volume Fraction With Susceptibility Source Decomposition as a Marker for Tissue Cellularity”**
Xu Li
- 1108 Deep Learning-Based Brainstem Segmentation and Multi-Class Classification for Parkinsonian Syndrome**
Seongken Kim, Pae Sun Suh, Woo Hyun Shim, Hwon Heo, Changhyun Park, Eunpyeong Hong, Saehyun Kim, Seung Hyun Lee, Dongsoo Lee, Wooseok Jung, Jinyoung Kim, Sungyang Jo, Sun Ju Chung, Young Hee Sung, Ho Sung Kim, Sang Joon Kim, Eung Yeop Kim, and Chong Hyun Suh
- Editorial**
- 1122 Editorial for “Deep Learning-Based Brainstem Segmentation and Multi-Class Classification for Parkinsonian Syndrome”**
Prithvijit Chakraborty
- Musculoskeletal**
- 1124 Characterization of Intratumoral Heterogeneity via MRI-Based Radiomic Habitats in Osteosarcoma**
Anqi Li, Rui Zheng, Jixiang Chu, Zhe He, Yao Wang, Chaofan Feng, Guangjun Yang, Dafu Zhang, and Huan Ma
- Editorial**
- 1138 Editorial for “Characterization of Intratumoral Heterogeneity via MRI-Based Radiomic Habitats in Osteosarcoma”**
Sha Yan and Lingqi Zhang
- Cardiac**
- 1140 Quantitative Confounder Analysis of Electrocardiogram Signals in Cardiac Magnetic Resonance at 1.5, 3 and 7 T—Assessing Standardized Electrode Positions and Sequence Types—Towards Quality Assurance**
Richard Hickstein, Stephanie Wieseemann, Darian Viezzer, Denise Kleindienst, Teodora Chitiboi, Bogdan Andrei Gheorghita, Jens Wetzl, Thomas Hadler, Sebastian Dietrich, Sebastian Schmitter, and Jeanette Schulz-Menger
- 1155 Cardiac Involvement After Exertional Heatstroke: Short-Term Cardiac MRI Follow-Up Study**
Jun Zhang, Xiang Kong, Li Qi, Shutian Xu, Tongyuan Liu, Jun Cai, Song Luo, and Long Jiang Zhang
- Pelvis**
- 1165 Biparametric MRI-Based Habitat Analysis Integrated With Deep Learning for Predicting Clinically Significant Prostate Cancer in PI-RADS Category 3 Lesions**
Shuitang Deng, Jinwen Hu, Hui Wang, Xiaoyu Han, and Weiqun Ao
- Chest**
- 1177 Ventilation and Perfusion Defects on Phase-Resolved Functional Lung (PREFUL) MRI Predict Silicosis Progression: A Prospective Pilot Study**
Tao Ouyang, Yiran Wang, Hongmei Zhang, Andreas Voskrebenezv, Jens Vogel-Claussen, Qiao Ye, and Qi Yang
- Editorial**
- 1188 Editorial for “Ventilation and Perfusion Defects on Phase-Resolved Functional Lung (PREFUL) MRI Predict Silicosis Progression: A Prospective Pilot Study”**
Edwin J. R. van Beek and Juergen Biederer

1190 3D Automated Segmentation of Bronchial Abnormalities on Ultrashort Echo Time MRI: A Quantitative MR Outcome in Cystic Fibrosis
Amel Imene Hadj Bouzid, Ilyes Benlala, Baudouin Denis de Senneville, Fabien Baldacci, Julie Macey, Wadie Benhassen, Pan Su, Stephanie Bui, Maeva Zysman, Aurelien Bustin, Patrick Berger, and Gael Dournes

Editorial

1201 Editorial for “3D Automated Segmentation of Bronchial Abnormalities on Ultrashort Echo Time MRI: A Quantitative MR Outcome in Cystic Fibrosis”
Marco Vicari and Mark O. Wielpütz

Guidelines

Technical

1204 Standardization of MR Electrical Properties Tomography: A Guideline From the ISMRM Electro-Magnetic Tissue Properties Study Group
Stefano Mandija, Alessandro Arduino, Chuanjiang Cui, Patrick Fuchs, Ilias I. Giannakopoulos, Yusuf Ziya Ider, Kyu-Jin Jung, Nitish Katoch, Ulrich Katscher, Dong-Hyun Kim, Riccardo Lattanzi, Thierry Meerbothe, Freddy Odille, Karin Shmueli, Paul Soullié, Khin Khin Tha, Luca Zilberti, and Cornelis A.
