

CONTENTS

■ SPECTROSCOPIC METHODOLOGY

Research Article

- Simultaneous in vivo detection of spectrally resolved glutamate, glutamine, and glutathione at 3 T with NAA-aspartyl editing and echo-time optimization,** Li An, Sungtak Hong, Tara Turon, Adriana J. Pavletic, Christopher S. Johnson, and Jun Shen 668
Published online 09 September 2025

■ PRECLINICAL AND CLINICAL IMAGING

Research Article

- T₁-weighted fMRI in mouse visual cortex using an iron oxide nanoparticle contrast agent and UTE imaging at 9.4 T,** Naman Jain, Saskia Bollmann, Kai-Hsiang Chuang, Jonathan R. Polimeni, and Markus Barth 680
Published online 30 September 2025

Technical Note

- Fast 3D UTE in vivo T₁ and T₂* mapping of fast relaxing knee tissues at 3 T,** Maik Rothe, Selina Riedel, Anne Slawig, Andreas Deistung, Klaus Bohndorf, Richard Brill, Walter A. Wohlgemuth, and Alexander Gussew 693
Published online 15 October 2025

■ IMAGING METHODOLOGY

Rapid Communication

- Revisiting signal intensity ratios for extending the dynamic range for iron overload estimation,** Eamon K. Doyle, Obdulio Carreras, and John C. Wood 706
Published online 02 November 2025

Mini Review

- Outlook on zero/ultrashort echo time techniques in functional MRI,** Silvia Mangia, Shalom Michaeli, and Olli Gröhn 714
Published online 06 September 2025

Research Article

- Dynamic pseudo-continuous arterial spin labeling angiography using a 3D-radial multi-spoke spoiled gradient-recalled sequence,** Andreas Petrovic, Martin Soellradl, Thomas W. Okell, Andrew Gauden, Leon Lai, Shalini A. Amukotuwa, and Roland Bammer 724
Published online 17 September 2025

- Scalable spokes pTx pulses for 2D turbo-spin-echo imaging at 7 T,** Minghao Zhang and Christopher T. Rodgers 740
Published online 30 September 2025

- Rapid free-breathing myocardial T₁ mapping with free-running interleaved multi-slice acquisition and respiratory motion correction using self-navigated auto calibration,** Hongzhang Huang, Zijian Zhou, Zhenfeng Lyu, Qinfang Miao, Genqiang Chen, Peng Hu, and Haikun Qi 756
Published online 05 September 2025

- Few-shot learning for highly accelerated 3D time-of-flight MRA reconstruction,** Hao Li, Mark Chiew, Iulius Dragonu, Peter Jezzard, and Thomas W. Okell 770
Published online 11 September 2025

- Combined angiography and perfusion using radial imaging and arterial spin labeling with structural contrast,** Thomas W. Okell, Joseph G. Woods, and Mark Chiew 787
Published online 16 September 2025

- Volumetric thermometry in moving tissues using stack-of-radial MRI and an image-navigated multi-baseline proton resonance frequency shift method,** Qing Dai, Shu-Fu Shih, Omar Curiel, Tsu-Chin Tsao, David S. Lu, Jason Chiang, and Holden H. Wu 803
Published online 11 September 2025

- Repeatability of diffusion-weighted arterial spin labeling MRI for mapping blood-brain barrier water exchange rate at different postlabel delays,** Yufei D. Zhu, Quimby N. Lee, Xingfeng Shao, Youngkyoo Jung, Danny J. J. Wang, and Audrey P. Fan 820
Published online 11 September 2025

- Accelerated motion-robust abdominal 3D T1p mapping using diamond radial sampling,** Sandeep Panwar Jogi, Qi Peng, Ramin Jafari, Ricardo Otazo, and Can Wu 835
Published online 11 September 2025

- Ex vivo human brain volumetry: Validation of MRI measurements,** Amy Gérin-Lajoie, Walter Adame-Gonzalez, Eve-Marie Frigon, Liana Guerra Sanches, Anna Nayouf, Denis Boire, Mahsa Dadar, and Josefina Maranzano 853
Published online 12 September 2025

- Assessing radiofrequency safety of active implants by measuring induced radiofrequency currents using MRI,** Chiara Hartmann, Mélina Bouldi, and Jan M. Warnking 868
Published online 13 September 2025

- Extending real-time MRI of the oral cavity using simultaneous multislice and compressed sensing,** Isaac Watson, Mike Angus, Elisa Zamboni, David Mitchell, Angelika Sebald, and Aneurin J. Kennerley 881
Published online 15 September 2025

- ISME— incoherent sampling of multi-echo data to minimize cardiac-induced noise in brain maps of R₂* and magnetic susceptibility,** Quentin Raynaud, Rita Oliveira, Nadège Corbin, Yaël Balbastre, Ruud B. van Heeswijk, and Antoine Lutti 897
Published online 17 September 2025

CONTENTS

Bidirectional crusher gradient method to estimate the labeling efficiency of pseudo-continuous arterial spin labeling MRI in mice, Xiuli Yang, Yuguo Li, Adnan Bibic, Maria Guadalupe Mora Alvarez, Hanzhang Lu, and Zhiliang Wei..... 912
Published online 17 September 2025

Contrast-optimized basis functions for self-navigated motion correction in quantitative MRI, Elisa Marchetto, Sebastian Flassbeck, Andrew Mao, and Jakob Assländer..... 927
Published online 17 September 2025

Transcranial Doppler ultrasound validation of BOLD-fMRI cerebral blood flow relationship, Genevieve Hayes, Joana Pinto, Sierra Sparks, and Daniel P. Bulte..... 939
Published online 17 September 2025

Focus correction in MR thermography for increased targeting precision during focused ultrasound procedures, Chang-Sheng Mei, Shenyan Zong, Bruno Madore, G. Rees Cosgrove, and Nathan J. McDannold..... 951
Published online 24 September 2025

Optimized 3D UTE and ZTE MRI for high-resolution lung imaging: A comparative study, Michael Carl, Jiaji Wang, James Lo, Jonathan H. Chung, Jiang Du, and Yajun Ma..... 962
Published online 30 September 2025

Scanner-based real-time automated volumetry reporting of the fetus, amniotic fluid, placenta, and umbilical cord for fetal MRI at 0.55T, Sara Neves Silva, Alena Uus, Hadi Waheed, Simi Bansal, Kamilah St Clair, Wendy Norman, Jordina Aviles Verdera, Daniel Cromb, Tomas Woodgate, Milou van Poppel, Johannes K. Steinweg, Jacqueline Matthew, Kuberan Pushparajah, David Lloyd, Vanessa Kyriakopoulou, Dimitris Siassakos, Anna David, Joseph V. Hajnal, Lisa Story, Mary A. Rutherford, and Jana Hutter..... 975
Published online 24 September 2025

Radial TRASE: 2D RF encoding through mechanical rotation and active digital decoupling, Christopher J. Sedlock, Aaron R. Purchase, Boguslaw Tomanek, and Jonathan C. Sharp..... 987
Published online 03 October 2025

Mapping a reproducible water fraction and T_1 using MP2RAGE and variable flip angle quantitative MRI protocols, Eden Mama, Rona Shaharabani, José P. Marques, and Aviv A. Mezer..... 1002
Published online 13 October 2025

Mitigating banding artifacts in balanced steady-state free precession using parallel transmission in a single acquisition, Chia-Yin Wu, Jin Jin, Markus Barth, and Martijn A. Cloos..... 1017
Published online 13 October 2025

Rapid whole-brain T_2^* and susceptibility mapping using 3D multiple overlapping-echo detachment acquisition and missing modality synthesis embedded simulation, Qinqin Yang, Longkun Chen, Nuowei Ge, Jie Chen, Jingying Yang, Zejun Wu, Chenyang Dai, Shuhui Cai, Zhong Chen, Lijun Bao, Lihong Zhu, Jianfeng Bao, and Congbo Cai..... 1030
Published online 03 October 2025

Cartesian MaxGIRF: Model-based EPI reconstruction incorporating gradient nonlinearity and concomitant field effects, Nam G. Lee, Sophia X. Cui, and Krishna S. Nayak..... 1044
Published online 03 October 2025

Advancing whole-brain BOLD functional MRI in humans at 10.5 T with motion-robust 3D echo-planar imaging, parallel transmission, and high-density radiofrequency receive coils, Shuxian Qu, Jiaen Liu, Peter van Gelderen, Jacco A. de Zwart, Jeff H. Duyn, Matt Waks, Russell Lagore, Alexander Bratch, Andrea Grant, Edward Auerbach, Lance Delabarre, Alireza Sadeghi-Tarakameh, Yigitcan Eryaman, Gregor Adriany, Kamil Ugurbil, and Xiaoping Wu..... 1068
Published online 18 October 2025

Technical Note
mtrk—A flexible environment for developing open-source MRI pulse sequences, Anaïs Artiges, Amanpreet Singh Saimbhi, Carlos Castillo-Passi, Riccardo Lattanzi, and Kai Tobias Block..... 1089
Published online 02 September 2025

Acceleration of slice encoding for metal artifact correction at 0.55 T using hexagonal sampling, Bahadır Alp Barlas, Kübra Keskin, Bochao Li, Brian A. Hargreaves, and Krishna S. Nayak..... 1098
Published online 03 October 2025

Automatic determination of glymphatic flow with the DTI-ALPS-index along the principal axis system in native imaging space corrects for head and fiber orientation Ali Ajouz, Olav Jansen, Lynn Johann Frohwein, Svea Seehafer, Naomi Larsen, and Jan-Bernd Hövener..... 1110
Published online 06 October 2025

Optimization of pseudo-continuous arterial spin labeling for brain perfusion imaging in the intraoperative setting, Carmen Sánchez-Albardiaz, Marta Calvo-Imirizaldu, Verónica Aramendía-Vidaurreta, Rebeca Echeverría-Chasco, Marta Vidorreta, Bartolomé Bejarano, Lain H. Gonzalez-Quarante, Ana Aransay García, Cristina Honorato, Elena Cacho-Asenjo, Antonio Martínez-Simon, and Maria A. Fernández-Seara..... 1123
Published online 19 September 2025

MR sequence design to account for nonideal gradient performance, Daniel J. West, Felix Glang, Jonathan Endres, David Leitão, Moritz Zaiss, Joseph V. Hajnal, and Shaihan J. Malik..... 1135
Published online 22 September 2025

Prospective compensation of second-order concomitant fields in a high-performance gradient system using a second-order harmonic shim coil, Afis Ajala, Thomas K. F. Foo, and Seung-Kyun Lee..... 1146
Published online 03 October 2025

Evaluation of an interleaved acquisition scheme for improved robustness of channel-wise relative B_1^+ mapping at 7 T, Nico Egger, Laurent Ruck, Sophia Nagelstraßer, Judith Schirmer, Saskia Wildenberg, Andreas Bitz, Jürgen Herler, Sebastian Schmitter, Michael Uder, and Armin Michael Nagel..... 1157
Published online 30 September 2025

CONTENTS

Optimized T_1 -weighted MP-RAGE MRI of the brain at 0.55 T using variable flip angle coherent gradient echo imaging and deep learning reconstruction, Oliver Bieri, Marcel Dominik Nickel, Claudia Weidensteiner, Philipp Madörin, and Grzegorz Bauman 1169
Published online 30 September 2025

Rapid 3D whole-brain high-resolution T_1 quantification: Accelerating standard inversion recovery with stack-of-spirals turbo FLASH acquisition, Zhen Hu, Dan Zhu, Yuguo Li, Jiadi Xu, and Qin Qin 1177
Published online 24 October 2025

■ COMPUTER PROCESSING AND MODELING

Research Article

Optimized reconstruction of undersampled Dixon sequences using new memory-efficient unrolled deep neural networks: HalfVarNet and HalfDIRCN, Sandra Martin, Amira Trabelsi, Maxime Guye, Marc Dubois, Redha Abdeddaim, David Bendahan, and Rémi André 1189
Published online 09 September 2025

On the structural and practical identifiability of multi-echo BBB-ASL tracer kinetic models, Tabitha J. Manson, David L. Thomas, Matthias Günther, Lynette J. Tippett, Michael Dragunow, Catherine A. Morgan, and Vinod Suresh 1205
Published online 11 September 2025

Two-point B_1 correction for CEST MRI by fusing voxel-wise interpolation and T_1W voxel-clustering, Yifan Li, Wenxuan Chen, Yi Wang, and Xiaolei Song 1223
Published online 24 September 2025

Inverting CEST or $R_{1\rho}$ data to generate solute spectra without a priori assumptions, Daniel F. Gochberg 1239
Published online 15 October 2025

Technical Note

Sampling of non-Gaussian Ensemble Average Propagators for the simulation of diffusion magnetic resonance images, Justino R. Rodríguez-Galván, Pablo Villacorta-Aylagas, Susana Merino-Caviedes, Federico Simmross-Wattenberg, Carlos Castillo-Passi, Pablo Irarrazaval, Antonio Tristán-Vega, and Carlos Alberola-López 1255
Published online 06 September 2025

■ HARDWARE AND INSTRUMENTATION

Research Article

A unipolar head gradient for high-field MRI without encoding ambiguity, Markus Weiger, Johan Overweg, Franciszek Hennel, Emily Louise Baadsvik, Samuel Bianchi, Oskar Björkqvist, Roger Luechinger, Jens Metzger, Eric Seth Michael, Thomas Schmid, Lauro Singenberger, Urs Sturzenegger, Erik Oskam, Gerrit Vissers, Jos Koonen, Wout Schuth, Jeroen Koeleman, Martino Borgo, and Klaas Paul Pruessmann 1266
Published online 30 September 2025

Making RF coils MR-invisible by additive manufacturing using magnetically filled polymer, Markus Weiger, Johan Overweg, Amelie Viol, Lauro Singenberger, Thomas Schmid, Emily Louise Baadsvik, and Klaas Paul Pruessmann 1279
Published online 06 October 2025

Technical Note

Subject grounding to reduce electromagnetic interference for MRI scanners operating in unshielded environments, Beatrice Lena, Bart de Vos, Teresa Guallart-Naval, Javad Parsa, Pablo Garcia Cristobal, Ruben van den Broek, Chloé Najac, Joseba Alonso, and Andrew Webb 1289
Published online 24 October 2025
