## PRELIMINARY PROGRAM

### Wednesday 29th May 2013 - Afternoon

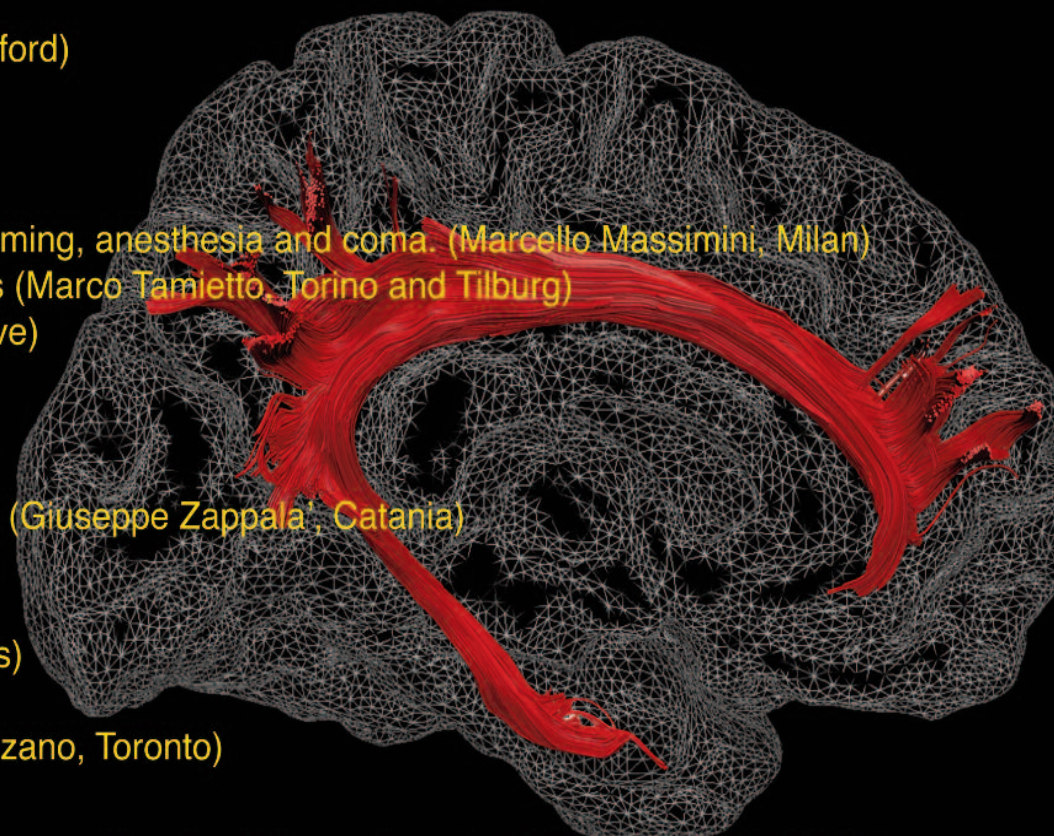

- An historical overview of the limbic system from Thomas Willis to the default network (Marco Catani, London)
- The circuit of Papez and beyond (John Aggleton, Cardiff)
- The functional anatomy of the orbitofrontal cortex (Edmund Rolls, Oxford)
- Neuroradiological aspects of limbic disorders (Alberto Bizzi, Milan)

### Thursday 30th May 2013 - Morning

- Cortical effective connectivity during wakefulness, NREM sleep, dreaming, anesthesia and coma. (Marcello Massimini, Milan)
- Neuronal bases of the non-conscious perception of emotional signals (Marco Tamietto, Torino and Tilburg)
- Reality confusion and the orbitofrontal cortex (Armin Schneider, Geneva)
- Keynote lecture: The insula (Rudolph Nieuwenhuys, Amsterdam)

### Friday 31st May 2013 - Morning

- Neuropsychological assessment of patients with frontal lobe damage (Giuseppe Zappala, Catania)
- Dysfunction of the reward system (Mathias Pessiglione, Paris)
- Assessment of early memory deficits (Stefano Cappa, Milan)
- Phineas Gage and H.M. revisited (Michel Thiebaut de Schotten, Paris)
- Limbic models of psychopathy and autism (Michael Craig, London)
- Psychosurgical approaches to neuropsychiatric disorders (Andres Lozano, Toronto)

Tractography workshop on basic and advanced diffusion methods: Thursday & Friday 15:00-18:00
