Your Responsibilities:
• Responsible for the delivery of in vivo preclinical imaging needs within GSK.
• Development and qualification of novel in vivo imaging capability within GSK supporting model selection, biodistribution and functional alterations to biology.
• Introduce and develop emerging technologies to track small/large molecule and cellular biodistribution (e.g. "click" chemistry), optical reporter labeling and newer, developing technologies (e.g. hyperpolarization)
• Perform in vivo imaging studies to support the needs of Discovery and PTS business partners ranging from drug design through safety evaluation to product/device development.
• Provide imaging guidance/instructions and collaborate closely with the wider Bioimaging department.
• Responsible for study support and data generation/management and communication to project/program teams
• Have overall responsibility for the MR, CT and optical imaging equipment within the in vivo imaging facility.
• Responsible for implementing and maintaining service contracts with imaging vendors.
• Responsible for protocol writing and oversight of the animal imaging protocols.
• Ensure high standards of animal care and compliance with all UK regulations and GSK policies.

Basic qualifications:
If you're a passionate In-Vivo Bio Imaging professional with a Magnetic Resonance specialization, put your Ph. D to work for GSK.

Preferred qualifications:
An exciting pipeline and dynamic cutting edge methodology is where you want to use your Ph.D. with postdoctoral and/or industrial imaging experience.

Recruiter:
Marge Musumeci

Hiring manager:
Andy Nicholls
