GE HEALTHCARE
MR Clinical Development Specialist

This role provides industry leading advanced applications support for the development and utilization of Magnetic Resonance scanners and applications. The primary responsibility of this specialist is to support selected academic institutions in clinical and research protocol optimization, help generate clinical proof points, and assist customers in operational efficiency and standardization improvements. This role will also act as a clinical “voice of the customer” to GE scientists and engineers during the application development phase to ensure that our solutions meet the customer’s requirements.

Location: United States; Boston, Baltimore/Philadelphia, or Chicago

Qualifications:
1. Certified Radiologic Technologist (ARRT) or global equivalent
2. Min. of 5 years’ experience in MR, including all clinical applications and performing procedures
3. Experience interacting with customers in various situations
4. Ability to present complex material to diverse audiences
5. Ability to work well independently and as part of a team
6. Creative, Flexible and Well Organized
7. Must be willing to work in the identified Academic Region – Boston, Baltimore/Philly or Chicago
8. Ability to travel 10-20% of the time

Preferred Qualifications:
1. Advanced Degree (Bachelor or Masters)
2. 10+ yrs. experience in the medical industry
3. Applications and/or Teaching Experience
4. MR Experience in various anatomies
5. Previous GE Healthcare Experience
6. Familiarity with the relevant GE HC MRI Product Range and clinical optimization
7. Competitive Experience
8. Ability to learn basic Linux commands and proficient in Microsoft office suite

Additional Eligibility Qualifications
- GE will only employ those who are legally authorized to work in the United States for this opening. Any offer of employment is conditioned upon the successful completion of a background investigation and drug screen.
