A post-doctoral position is immediately available in the Quantitative Body MRI research group at the Translational and Molecular Imaging Institute and the Department of Radiology at the Icahn School of Medicine at Mount Sinai in New York City for a motivated PhD or MD/PhD. The research group is composed of physicists, radiologists and coordinators (https://tmii.mssm.edu/research/research-laboratories/taouli-lab/).

The primary responsibility of this position is to analyze and post-process advanced MRI quantification methods (diffusion, perfusion and elastography), with an emphasis on radiomics and texture analysis in oncology. Background in MRI Physics and/or image processing is required. Please send a current CV and letter of interest, as well as 3 references to Bachir Taouli: bachir.taouli@mountsinai.org
