Postdoctoral Fellows in MRI Physics & Software Engineering

The University of Hong Kong, Hong Kong SAR, China

Three-year postdoctoral fellowship positions are immediately open. Successful candidate is expected to have a strong interest and training in physics, engineering, or mathematics. He/she will join a dynamic MRI research group. Our group specializes in MRI physics, computing and engineering.

*We aspire to develop next generation of human MRI technologies that can meet routine clinical needs but with dramatically reduced operational complexity and scanner costs.* We encourage out-of-box thinking to advance MRI accessibility in healthcare.

*Successful candidates are expected to be highly motivated and possess solid training in MRI physics, sequence programming, computing-centered image reconstruction, image processing, data analytics, OR/AND software engineering.*

Salary will be highly competitive depending experience, and comparable to North America and European standards. If interested, please send CV and names of 3 references to:
