Open Postdoctoral Position

The Radiological Sciences Laboratory (https://med.stanford.edu/rsl.html) located in the Stanford University Department of Radiology Lucas Center for Medical Imaging has an opening for a postdoctoral researcher with expertise in magnetic resonance (MR) physics and imaging. The new team member will be joining a highly multidisciplinary research group and will work on the development and translation of multinuclear MR imaging and spectroscopic techniques for the in vivo assessment of metabolism. The project will involve small animal imaging studies using a combination of $^1$H, $^2$H, and $^{13}$C MRI/MRS, with the ideal candidate having experience on a Bruker system. Excellent communication skills and the ability to work in a group setting are very important. The appointment is for 1 year, renewable for 2-3 years total.

Required Qualifications:
- Applications should have a PhD in MR physics or a related field.
- Experience with small animal imaging

Required Application Materials:
- Cover letter with current and future research interests
- Updated curriculum vitae
- Names and contact of information for three referees

Submit Application Materials via Email to:
- Prof. Daniel Spielman, spielman@stanford.edu

Stanford is an equal opportunity employer and all qualified applicants will receive consideration without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, veteran status, or any other characteristic protected by law.
