Postdoc Position in Pediatric Neuroimaging Research

The brain imaging research lab at the Arkansas Children’s Nutrition Center (ACNC), affiliated with the University of Arkansas for Medical Sciences (UAMS) and Arkansas Children’s Hospital (ACH), is seeking potential applicants for a postdoc position available starting immediately. The postdoctoral fellow is expected to work on federal grants funded research projects, which aim to understand how prenatal/postnatal environmental influences as well as nutrition/lifestyle during childhood potentially affect infant and children’s brain development. The research involves advanced brain imaging data analysis using cutting-edge tools.

ACNC is one of the six nutrition centers funded by USDA and one of the two nutrition centers dedicated for children's nutrition related research. UAMS provides the only medical and pharmaceutical education in the state of Arkansas, and is the state’s largest, most comprehensive facility for medical treatment and biomedical research. ACH is the only health care facility in Arkansas dedicated exclusively to children and one of the largest pediatric hospitals in the nation. ACH has been rated multiple times by Fortune as one of the 100 best companies to work for. The postdoctoral fellow will have an opportunity to collaborate with physicians/scientists in different specialties, and will have access to state-of-the-art clinical research facilities at UAMS/ACH/ACNC.

Desired qualifications and skills:

- A PhD degree in physics, biomedical engineering, computer science, information science, bioinformatics, neuroscience or other related fields.
- Preferred: experience in neuroimaging MRI data analysis
- Demonstrated record of research publications
- Good verbal and written communication skills

Interested candidates please send your CV to ouxiawei@uams.edu
