Postdoctoral Research Fellow Position

This position will focus on the development and validation of innovative neuroimaging methods for improved analysis of structural MRI brain imaging data. The role offers the opportunity to work with world leaders in neuroimaging software development and analysis, and to be part of a globally significant project.

Requirements:
- A Ph.D. or equivalent degree
- Research experience in structural MRI analysis methods; e.g., segmentation, atlas and longitudinal registration
- Experience with FreeSurfer, FSL, and/or the HCP analysis pipeline
- Extensive experience with Matlab, Python, C/C++ or other relevant programming languages
- Excellent organizational and problem-solving skills; ability to plan, prioritize and keep multiple projects/tasks moving forward at once
- A track record of documented productivity

How to apply:
Interested candidates should send a full CV, a one-page statement of research interests and career goals, and contact information for three references to:

abcd-daic@ucsd.edu

Questions and inquiries are welcome. Please include “ABCD sMRI postdoc” in the subject.
