MRI Scientist

The Department of Radiology at SUNY Upstate Medical Center at Syracuse seeks an individual to serve within the Image Science Division as full-time faculty member. The SUNY Upstate Medical Center, a level 1 trauma center for Central New York, as well as Upstate University Hospital at Community General, has a total of 693 beds. The academic health center in Syracuse, New York, is a short drive from the Adirondack Mountains, the Finger Lakes and Lake Ontario. Our 38-member subspecialized radiology group (currently including 3 PhD medical physicists) provides service to the main campus at University Hospital including a Cancer Center and Pediatric Hospital, Upstate University Hospital at Community General, two satellite offices, and two private imaging centers. A further clinical outpatient building and second Cancer Center are expected to open in the first quarter of 2022.

Candidates must have a PhD in Medical Physics or related field and be board certified or board eligible in Diagnostic Medical Physics or Magnetic Resonance Imaging Physics. The Radiology department currently operates six scanners at multiple facilities including five 3T scanners, and three 1.5 T scanners. Responsibilities include: CLINICAL DUTIES: 40% of time spent on assisting in the maintenance and operation of the QA programs pertaining to clinical MR operations at all MR imaging locations; both hospital and outpatient centers. Teaching: 30% of time teaching residents, fellows and medical students. RESEARCH: 30% of time of MR-based research activities and maintaining a good publication record in peer reviewed journals.

Applicants should apply through the SUNY Upstate online job application portal at https://www.upstate.edu/hr/jobs/index.php. The posting is listed under Physician, Faculty and Librarian as Job Number 64276.

SUNY Upstate Medical Center is a smoke-free campus, an equal opportunity/affirmative action employer, and encourages minority and female applicants to apply.
