Pediatric Neuroradiology Faculty Position

The Lucile Packard Children's Hospital (LPCH) and Department of Radiology at Stanford School of Medicine are searching for a full-time Pediatric Neuroradiologist in the Division of Pediatric Radiology. This faculty appointment would be open rank in the Medical Center Line or Clinician Educator Line. The major criteria for appointment for faculty in the Medical Center Line are excellence in the overall mix of clinical care, teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill. The major criterion for appointment for Clinician Educators is excellence in the overall mix of clinical care and clinical teaching appropriate to the programmatic need that the individual is expected to fulfill. Faculty rank and line will be determined by the qualifications and experience of the successful candidate.

The applicant will have an M.D. or M.D./Ph.D. degree(s) or equivalent, must be board-certified or eligible in diagnostic radiology, and have completed or be eligible for fellowship in Pediatric Neuroradiology. Fellowship training in pediatric radiology or demonstration of equivalent experience will be considered but is not required. Candidates must have passed all three steps of the USMLE exams prior to beginning their appointment. High level expertise in clinical pediatric neuroradiology will be required, and a commitment to education and service to referring clinicians are highly valued.

The Lucile Packard Children's Hospital located in northern California on campus of Stanford University opened a new hospital in 2017 to increase capacity and meet growing needs for specialized pediatric and obstetric care. LPCH provides a full range of primary thru quaternary patient services. Centers of Excellence include: Neuroscience, Cardiovascular Medicine, Cancer, and the Center for Maternal and Fetal Health. Stanford Children's Health is also expanding off campus inpatient and outpatient clinical services via joint ventures with regional hospitals and multiple imaging centers. Pediatric radiology offers a full range of imaging services with state-of-the-art technology. The program has undergone significant expansion over the past ten years with the appointment of 13 new pediatric radiology faculty.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford welcomes applications from all who would bring additional dimensions to the University's research, teaching and clinical missions.

Interested candidates should apply on-line at <http://radiology.stanford.edu> by submitting your curriculum vitae and a candidate statement describing your clinical, teaching and research activities and interests.
