NordicNeuroLab AS is a leading supplier of hardware and software for functional MRI studies, used for diagnosis of diseases and injuries related to brain function. Our customers include hospitals and research centers worldwide. NordicNeuroLab has over 40 employees and our main office is located in Bergen, Norway, with headquarters in the US covering the Americas (Milwaukee WI), and offices in Germany and France. Our employees have a diverse background from different disciplines, and we offer excellent academic and career opportunities in a young, dynamic environment.

**Application Scientist – United States**

**Job Description**
NordicNeuroLab is expanding and we are searching for a customer-oriented Application Scientist within functional MRI with **specialization in Perfusion techniques**. This person will be responsible for strengthening NordicNeuroLab’s customer and partnership network in North America, ideally located on the West Coast.

**Tasks**
- Facilitate sales through customer interaction and offering demonstrations, customer support, and application training at customer sites and online,
- Deliver presentations and product demonstrations at conferences and workshops,
- Establish and maintain reference site collaborations,
- Maintain an overview of market developments and trends to identify future NNL applications and product improvements,
- Explore and evaluate emerging technologies where appropriate for collaborations or commercialization,
- Link with international research groups and develop a strong network of contacts,
- Participate in organizing workshops and establishing application programs.

**Qualifications**
* Master of Science, but preferably a PhD within medical technology, medical engineering or physics.
* Experience within the field of advanced MR perfusion and diffusion techniques, experience with functional MRI is desirable.
* Experience with and knowledge of MRI acquisition and post-processing techniques is highly desirable.
* Experience from medical imaging industry is desirable.
* Strong interpersonal skills.
* Self-starter with ability to work independently.
* Excellent communication skills both written and oral.
* English fluency, both written and verbal, other languages are an advantage but not a requirement.
