The MRI Technology Program in the Division of Intramural Research (DIR), National Heart, Lung, and Blood Institute (NHLBI) is seeking exceptional candidates for the position of Staff Scientist. The MRI Technology Program is focused on the development of MRI techniques for diagnostic imaging and interventional image guidance with a focus on well-engineered solutions that can be deployed in a clinical environment. We are particularly interested in developing fast, patient friendly MRI techniques, applied for imaging the heart and lungs.

Position information:
- The staff scientist would be responsible for conducting independent research in the field of MRI engineering developing new MRI techniques for the heart and lung using a contemporary 0.55T scanner. The staff scientist would also be responsible for providing technical support of projects within NHLBI's MRI Technology Program.
- Candidates must have a PhD in MRI physics, engineering, or related discipline. Postdoc experience (including a proven track record of scientific productivity) in the field of diagnostic and/or interventional MRI is a must.
- Experience with pulse sequence programming (preferably on the Siemens platform) is and experience with programming high performance image reconstruction software is expected.
- Strong candidates would also have experience with interactive imaging, fast image reconstruction and non-Cartesian imaging.
- Candidates should have a strong desire to explore new technologies with the purpose of developing clinically useful solutions.

The laboratory is based on the NIH campus in Bethesda, MD. The NHLBI DIR has a strong history of MRI development under the leadership of Robert S. Balaban. There are interactions with a wide range of independent research groups, and the position offers exceptional opportunities for interdisciplinary collaboration within and outside of the NIH (https://www.nhlbi.nih.gov/research/intramural).

Salary is commensurate with research experience and accomplishments. Appointees may be US citizens, resident aliens, or non-resident aliens with or eligible to obtain a valid employment authorized visa.

Applications from women, minorities and persons with disabilities are strongly encouraged. Applicants should email curriculum vitae and three letters of reference to:

Adrienne Campbell-Washburn, Ph.D.
c/o Maria Gonzalez-Stoltzfus
gonzamar@nih.gov

The review of applications will begin on or around Sep 1, 2021.
Applications will be accepted until the position is filled.
