In its 25th year, Advanced Imaging Research doing business as SREE Medical Systems in Cleveland, USA is dedicated to safe pediatric and adult MRI. We welcome curious scientists, physicists, and engineers to be a pivot in the advanced R&D team designing innovative next-generation devices and MR Systems.

Projects of Interests are:

- Next-generation RF coils, MR components, devices, and system developments intended for pediatric subjects and adults
- Out-of-the-box, unconventional, heuristic opportunity applicable to improving human health conditions in the developed and LMICs (MR, non-MR, covid, etc.)

You must be:

- A PhD, Post-Doc or equivalent with experience in MR or other field of training
- Experienced with RF coils, MR components and MR systems design preferred - Hardware Physicists / Engineers
- A professional with a personal demeanor, able to work as part of a team & adapt to the rapidly changing modality

Kindly email the following to ravi@sreemedical.com:

1. A cover letter describing academic/research experiences, career goals and hobbies
2. Curriculum Vitae (PHS398 addition, a plus) and
3. Three References

We are an Equal Opportunity Employer.
