JOB OPPORTUNITY: Research Assistant/MRI Technologist

The Research Assistant/MRI Technologist will be primarily responsible for running MRI scans on one of the two MR scanner systems at The Lewis Center for Neuroimaging (LCNI). This Technologist will screen subjects prior to MRI scanning, as well as administer and update established safety training protocols for researchers and staff.

LCNI is a Core Research Facility at the University of Oregon dedicated to serving the imaging research community in neuroscience and biological imaging. LCNI’s mission is to provide resources to conduct MRI research to members of the University of Oregon and the surrounding community. The Center operates two 3T Siemens MRI systems, a Prisma and a Skyra magnet, as well as other equipment that enables users to acquire imaging data.
