Research Specialist 2, Imaging Technician/Scientist

University of Chicago, BSD NSU - Neurological Surgery - Awad Lab

The Department of Neurological Surgery seeks applicants for a Research Specialist position to support imaging biomarker research in a research program with a focus on translational medicine. The incumbent will have the opportunity to work and collaborate with clinical and basic scientists from a range of disciplines including radiology, neurosurgery, neurology, and related disciplines. The candidate will be working with medical imaging data acquisition and processing (primarily MRI and MicroCT) in a team-oriented environment.
