

## **Magnetic Resonance Research Laboratories (MRRL) Project Scientist-Zhong laboratory**

**University of California Los Angeles**

**Requisition Number:** JPF08763

The Magnetic Resonance Research Laboratories (MRRL) in the Department of Radiological Sciences at UCLA seeks to fill a project scientist position in the Zhong laboratory. This project scientist scholar will work under the guidance of Dr. Xiaodong Zhong to collaborate with interdisciplinary teams, including physicist and physician faculty, postdoctoral and other project scientist scholars, clinical residents and fellows, and graduate student researchers in Radiological Sciences, the Ahmanson/UCLA Adult Congenital Heart Disease Center, and other departments in UCLA Health to develop, lead, and support research projects in the areas of MR pulse sequence development, image acquisition and reconstruction, data analysis, pre-clinical investigation, and clinical translation and evaluation, especially for applications in diagnosis, treatment planning and monitoring of cardiovascular diseases. Level and compensation are commensurate with experience.

This project scientist scholar will

- Manage and coordinate projects and experiments
- Communicate with the PI and collaborators and present/report projects effectively in the oral or written format
- Work independently and in a team environment, depending on the need of individual projects
- Design, implement, and test novel MRI pulse sequence, image reconstruction and data analysis techniques for research and clinical translation
- Supervise and mentor doctoral and postdoctoral trainees
- Author or contribute to scientific publications and grant applications
- Establish and maintain the Lab's research infrastructure such as hardware/software environment

About UCLA MRRL: The MRRL currently has 10 faculty members and more than 30 staff, students, and post-doctoral research fellows from Radiological Sciences and other departments. The MRRL collaborates closely with clinicians and engineers at UCLA. The MRRL has access to five clinical research Siemens MRI systems (3T Vida, 3T Prisma, 3T Skyra, 1.5 T Sola, and 1.5T Avanto Fit systems), as well as a dedicated imaging research facility for pre-clinical studies (including one 3T Prisma) and one

MR/PET system (Siemens mMR). For more information, please visit <https://mrrl.ucla.edu/>

About Ahmanson/UCLA Adult Congenital Heart Disease Center: The Ahmanson/UCLA Adult Congenital Heart Disease Center was founded in 1980 and it was the first in the United States to focus exclusively on treating adult congenital heart disease patients. Since then, it has been one of the largest facilities of its kind in the United States. The center provides clinical care to various types of congenital heart diseases. The center also has world-leading research and training programs.

About UCLA Health: For the 34th consecutive year, UCLA Health hospitals were named to the U.S. News & World Report national honor roll of best hospitals. This distinction was reserved for only 22 hospitals among more than 4500 evaluated across 15 specialties and 21 common procedures and conditions. UCLA Health was designated “high-performing” relative to other hospitals in treating patients 65 and older in 21 common procedures and conditions. Among them are various cancers, hip and knee replacement, heart attack and bypass surgery, stroke and diabetes.
