CENTER FOR ADVANCED HUMAN BRAIN IMAGING RESEARCH

Lead Research MRI Technologist Position

CAHBIR is a full service biomedical research imaging center located in Piscataway, NJ, USA that provides cutting edge technology and analytical support to Rutgers and Princeton biomedical researchers. Since we only perform research scans, clinical scans do not interfere with the work. We are personally invested in the quality of the data and need an MRI technologist that prioritizes discovery and collaboration.

Rutgers is a welcoming place to expand your skills and grow your career in an environment that values contributions from the entire team.

Contact us to discuss your interest in the position. Scan the QR code below or visit go.rutgers.edu/mri-tech-job to apply.

RUTGERS
Brain Health Institute

Flexible Work Hours
Our MRI technologist will be able to schedule their work hours around demand and use time not scanning for professional improvement and education.

University Benefits
Rutgers Health employees enjoy a generous benefits package with 15 holidays, 3 admin leave days, 15 vacation days, and 12 sick days each year - all paid.

Tuition Remission
Rutgers Health employees and their dependent children get a tuition remission benefit for courses taken at Rutgers.

Research Scanning Only
CAHBIR only performs research scanning; routine clinical loads are not part of our model. This reduced load adds flexibility and freedom to the role.

Campus Life
CAHBIR is located in a peaceful suburban setting with convenient parking.
