

**College of Medical Veterinary & Life Sciences
School of Psychology & Neuroscience**

Vacancy title: Lead Research Radiographer

Vacancy Reference: 193613

Salary: UofG Grade 8, £50,253 - £58,225 per annum

This post is full time (35 hours per week) and open ended (permanent)

The University of Glasgow has been changing the world for more than 570 years, and today we are one of the world's top 100 universities. We are delighted to have recently been awarded Scottish University of the Year by the Times & Sunday Times Good University Guide 2024.

Our people have always been at the forefront of innovation, and our past achievements inspire our current world changers.

We have an exciting opportunity for a Lead Research Radiographer to join the School of Psychology & Neuroscience on a permanent basis. The post holder will provide advanced technological and specialist services and expertise in MR imaging, playing a central role in the delivery and development of leading-edge imaging services.

The post holder will collaborate with university researchers and NHS staff to ensure the safe, effective and high-quality operation of multiple MR-scanners. You will provide specialist support and technical guidance to research staff (e.g., tailored sequencing, project planning and delivery, etc) and you will promote cutting-edge research, across a breadth of research activities, including both healthy volunteer and patient work.

As senior independent specialist, you will provide strategic and functional technical leadership to PIs and research staff, including coordinating research protocols, facilitating practical implementation of all new studies and detecting and investigating contraindications or incidental findings. You will manage and lead all practical aspects of the service delivery, ensuring patient contact, consent and welfare requirements are adhered to. Candidates are expected to be HCPC-registered and will typically have developed the required expertise through substantial experience in senior technical roles and/or significant research experience using MR imaging.

Informal enquiries are welcomed and should be directed to Marios Philiastides,

Marios.Philiastides@glasgow.ac.uk

Apply online at <https://www.jobs.gla.ac.uk/job/lead-research-radiographer-5829684>

Closing date: 23:45 on Tuesday 30th June 2026

The University of Glasgow has a responsibility to ensure that all employees are eligible to live and work in the UK. If you require a Skilled Worker visa to work in the UK, you will be required to meet the eligibility requirements of the visa route to be assigned a Certificate of Sponsorship.

Please note that this post may be eligible to be sponsored under the Skilled Worker visa route if tradeable points can be used under the Skilled Worker visa rules. **For more information please visit:** <https://www.gov.uk/skilled-worker-visa>

We believe that we can only reach our full potential through the talents of all. Equality, diversity and inclusion are at the heart of our values. Applications are particularly welcome from across our communities and in particular people from the Black, Asian and Minority Ethnic (BAME) community, and other protected characteristics who are under-represented within the University. Read more on how the University promotes and embeds all aspects of equality and diversity within our community <https://www.gla.ac.uk/myglasgow/humanresources/equalitydiversity/>.

We endorse the principles of Athena Swan <https://www.gla.ac.uk/myglasgow/humanresources/equalitydiversity/athenaswan/> and hold bronze, silver and gold awards across the University.

We are investing in our organisation, and we will invest in you too. Please visit our website <https://www.gla.ac.uk/explore/jobs/> for more information.
