MR Applications Trainer

The uMR Applications Trainer is responsible for developing and delivering training curriculum for uMR Applications across all uMR product lines. This role requires the ability to design and deliver engaging, continuous learning experiences for United Imaging, business partners, and customers. The Trainer will also ensure the training program remains compliant with FDA guidelines and the requirements of the Quality Management System.

The successful candidate will bring 10+ years of experience in clinical instruction related to capital equipment. The uMR Applications Trainer must thrive in a fast-paced environment and work collaboratively with a team dedicated to supporting healthcare customers nationwide. This position reports to the Applications Manager.

Duties & Responsibilities

- Develop Applications training curricula that align with headquarters' training program and comply with FDA regulations.
- Lead technical knowledge transfer to field-based Applications and Clinical Marketing teams.

- Deliver training on the safety, operation, repair, and maintenance of equipment, demonstrating a thorough understanding of industry practices and company standards and procedures.
- Develop training materials for new products and procedures.
- Support the maintenance and deployment of online e-learning systems.
- Maintain records in compliance with FDA regulations and headquarters/QM standards.

Minimum Requirements

Education

- Bachelor's and/or Master's degree in a related field (e.g., Radiologic Technology or a related discipline), or equivalent experience.
- ARRT/MRSRT certification in MR

Experience

- 10+ years of experience in MR applications course development and instruction, preferably with high-field MRI systems
- Experience with 1.5T and 3T systems, or higher field systems.
- Research background (a plus)
- Experience maintaining and using online LMS platforms is a plus

Required Skills & Attributes

- Strong organizational and communication skills
- Collaborative team player committed to delivering excellent customer satisfaction
- Proficient in Microsoft Office and/or other course development platforms
- Customer-focused with a passion for solving customer problems
- Ability to travel periodically across the U.S. and to China (up to 50-60%)
- Strong MR physics background.
- Knowledgeable on advanced neuro imaging techniques such as ASL, spectroscopy, perfusion, and DTI, Cardiac imaging, MSK, etc.
