

Swedish Candidate 1:

Tieqiang Li, Stockholm, Sweden

Adjunct Professor of MRI physics, Division of Medical Imaging and Technology, Department of Clinical Science, Intervention and Technology (CLINTEC), Karolinska Institute, Stockholm, Sweden

I am a MRI physicist at Karolinska University Hospital and adjunct professor at Karolinska Institute, besides clinical duties, I am also responsible for the R&D in the group. There are about 20 MRI physicists at Karolinska University. I would like to work for the Nordic Chapter in such a way that the MRI physicists at Karolinska University Hospital are more closely connected with the association by organizing MRI workshops or a MRI course for the Ph.D. students.
